Case Study: AAVE

- 流通量: 15.09M AAVE
- 每次提案仅有 0.6-0.8M AAVE 表决
- 参与率同样仅约 5%
- 参与投票的地址数甚至低于500

Background

动机

去中心化治理的价值

- 去中心化、民主、反垄断反独裁、社区生态氛围
- 与我们手中的币价息息相关

民主vs民主参与荒漠化

- 美国大选60% vs Uniswap提案5%
- 极低的参与率 → 极大的潜力，AI时代技术完全可以释放这些潜力

认知门槛高

- 治理提案冗长乏味，用户“看不懂”、“不想看”、“没时间”
- “想象你打开一个治理社区，点进其中一个随机的提案，面对长达上千单词、充满专业术语的、枯燥的提案文档——你会怎么做？**直接右上角关闭？还是跟风大户？**”

Background

动机

去中心化治理的价值

- 去中心化、民主、反垄断反独裁、社区生态氛围
- 与我们手中的代币息息相关

EchoVote给你第三种选择

民主vs民主参与荒漠化

- 美国大选60% vs. Irrelevant
- 极低的参与率

让AI成为你的治理替身

认知门槛高

- 治理提案冗长乏味，用户“看不懂”、“不想看”、“没时间”
- “想象你打开一个治理社区，点进其中一个随机的提案，面对长达上千单词、充满专业术语的、枯燥的提案文档——你会怎么做？直接右上角关闭？还是跟风大户？”

Our Solution

价值观抽象

价值观向量化

- 通过价值观量表生成用户的价值观向量
- 20个维度，每个维度10种可能的取值
→ 状态空间： 10^{20} 强大的表达能力

EchoVote Disconnect

Portfolio

Values Test

Question 1 of 20

DAOs must fully comply with the financial regulatory laws of their respective countries, even if it requires sacrificing anonymity.

Our Solution

价值观抽象

AI原型体拟合

- 多个具有代表性的性格鲜明的AI原型体
- 以所有原型体的价值观向量作为基，在高维空间中拟合用户的价值观向量
- 根据拟合结果构造用户量身定制的、最能符合用户自身价值观的代理人

Top Trader

Alice

Alice is a data-driven crypto trader who prioritizes market trends, technical analysis, and profitability. She values precision over hype, focusing on DeFi and tokenomics.

Pragmatic

Data-Oriented

The Geek

Bob

A dedicated blockchain developer focused on decentralization, privacy, security, and long-term impact of blockchain technology on society.

The Conservative

Carol

A cautious advocate for crypto adoption, prioritizing stability, security, and regulatory compliance over speculation.

Pro-Stability

Risk-Averse

Regulatory Pragmatist

Eric

Eric supports crypto projects that align with legal frameworks, emphasizing compliance, KYC, and institutional collaboration for long-term adoption, even at the cost of decentralization.

Compliance

Regulatory

Autonomy Purist

Frank

Frank is a staunch advocate for radical decentralization, rejecting KYC, governance, and regulation. She prioritizes censorship resistance and anonymity, believing that regulation undermines Web3's core values.

Anti-Regulation

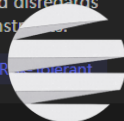

Decentralization

Protocol Maximalist

Gavin

Gavin is focused on technical perfection, prioritizing scalability, security, and cryptographic purity over user-friendly solutions. She dismisses compromises that affect

ARFC • Launch GHO on Gnosis Chain AAVE

This proposal aims to launch GHO on the Gnosis chain and designate ARFC as the Emissions Manager for GHO rewards and incentives. Deploying GHO to Gnosis is one part of karpkey (formerly karpkey) mandate and a milestone towards sGHO (saving money) deployment. Gnosis Chain has low transaction fees, an engaged community, and a rapidly growing suite of DeFi applications focused on RWAs and innovative payment solutions like Gnosis Pay.

TEMP CHECK • Aave Decentralized Acqui-Hire Framework AAVE

In a Darwinian world with (too) many tokens, there should be a way to conduct 'acqui-hire' mergers, where the best-performing project (Aave) attracts talent. Hence we need a permissionless acqui-hire framework.
